

ENSURING QUALITY AND SAFETY IN HEALTHCARE WITH PROTECHT

Protect your patients. Prove your performance.

Protecht unifies risk, governance, patient safety, compliance, and cyber risk in one platform, helping healthcare providers improve quality of care, meet regulatory obligations, and strengthen resilience with real-time insight and AI-guided workflows.

Risk visibility that protects reputation and quality of care.

Create a governed, enterprise-wide view of risks, obligations, and controls that strengthens resilience and safeguards reputation.

Centralise enterprise, clinical, vendor, and cyber risks into a single governed location

Link risks, incidents, and controls to uncover dependencies and vulnerabilities

Access pre-configured frameworks such as ISO 27001, NIST CSF, and ACSC Essential Eight

Protecht's safe and smart AI assistant Cognita enhances data quality by guiding staff in logging incidents consistently and identifying duplicates or related entries

Elevate patient safety with real-time insight and action.

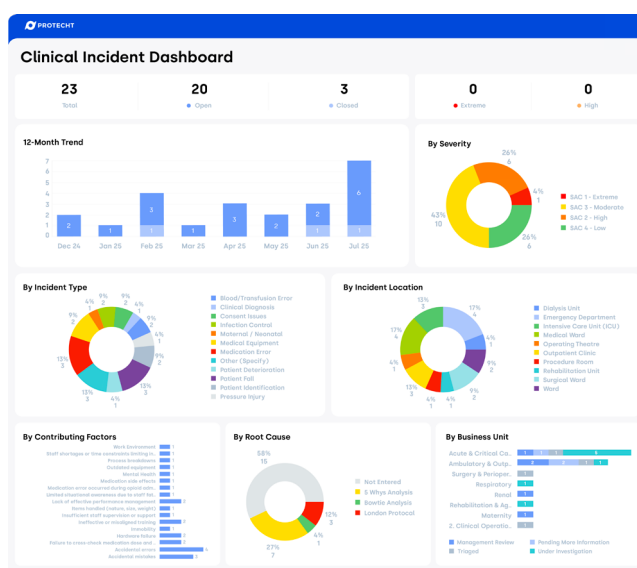

Improve safety outcomes with incident capture, feedback management, and continuous improvement.

Report clinical, operational, and cyber incidents with configurable forms

Automate escalations with support for state-based incident reporting frameworks and Notifiable Data Breach Scheme Obligations

Maintain full audit trails from reporting to resolution, as well as linking incidents to the relevant NSQHS Standard

Cognita ensures complete, accurate incident records for stronger root cause analysis

Confident compliance in a complex regulatory landscape.

Simplify compliance management and demonstrate assurance to regulators, auditors, and boards.

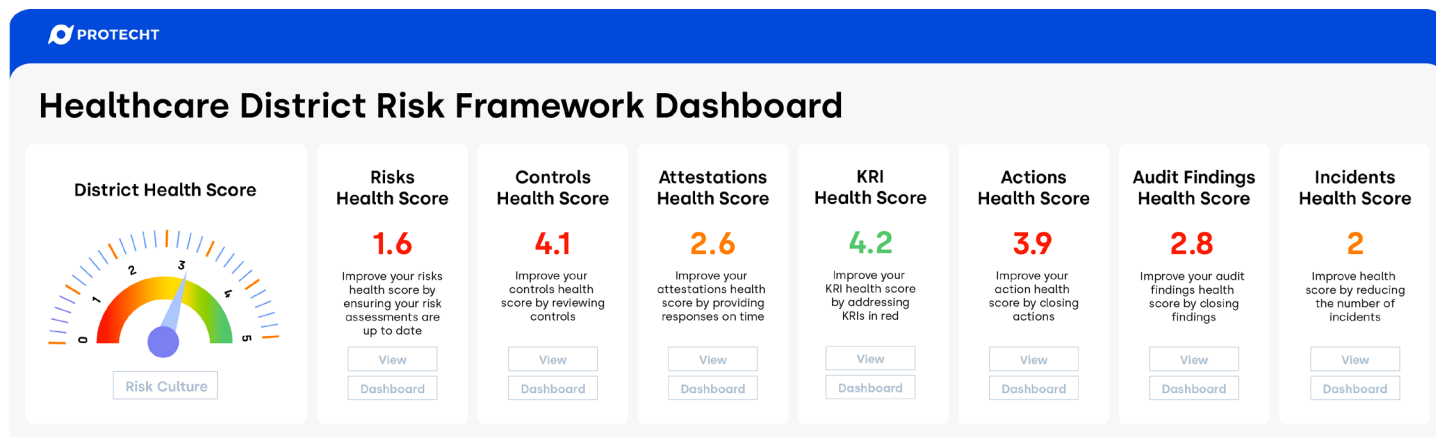

Monitor obligations under the NSQHS Standards, Aged Care Act, Privacy Act, and ISO 27001

Automate compliance registers, evidence collection, and audit reporting

Leverage integrated regulatory content and alerts from trusted providers

Secure, synchronised data underpins confidence in your compliance story to regulators, auditors and the board

Operational efficiency that reduces risk and redundancy.

Free teams from manual processes and fragmented tools with integrated workflows that reduce duplication and accelerate response.

— Replace spreadsheets with structured registers for risks, controls, audits, and actions

— Automate task assignments and remediation workflows to improve closure rates

— Provide role-based dashboards for executives, managers, and frontline teams

— Cognita reduces rework by surfacing trends across incidents and highlighting areas for process improvement

Adaptable, scalable, and built to integrate

Deploy a platform that grows with your organisation, integrates with existing systems, and adapts to evolving requirements.

— Configure workflows to match the needs of individual facilities or multi-entity networks

— Integrate seamlessly with IT, HR, and clinical systems to minimise silos

— Scale effortlessly to support changing regulatory expectations and organisational growth

— Extend functionality with the Protecht Marketplace, featuring pre-built healthcare and cyber use cases

Flexible risk management. Designed for healthcare resilience.

Your insights. Made for action.	Get a full picture of your risk and incident landscape, fast. Protecht transforms raw risk, incident, and audit data into real-time dashboards and reports tailored for healthcare operations.
A platform that fits your care model.	No two health services are the same, and Protecht doesn't force you into a mould. Whether you're a public hospital network or a private day surgery, you can configure your GRC workflows without coding.
Risk ownership made easy.	Engage clinical, operational, and executive staff with a clean, intuitive interface that works the way they do. With Protecht, safety and compliance become second nature not a checkbox exercise.
Experts in risk. Partners in healthcare.	We don't just hand over the keys. Our team works side-by-side with you to understand your clinical workflows, governance structure, and accreditation requirements and then make Protecht fit.
Built for Australian health regulation.	Map your governance processes to the NSQHS Standards, Aged Care Quality Standards, and other regulatory frameworks in real time: no spreadsheets or guesswork needed.
Built for trust. Designed for safety.	Protect sensitive health and incident data with enterprise-grade security, privacy, and compliance. Protecht helps you manage cyber risk, safeguard patient information, and stay audit-ready.

Our expertise. Your success.

A platform designed and built by GRC specialists for GRC professionals. Advisors and implementation support teams with years of experience. It's not just a product: it's a relationship.
